

**The working class, the young people, the women of the popular strata have buried under an avalanche of NO the constitutional counter-reform wanted by the monopolies and their government.**

## **Unity and struggle against the reactionary, austerity and war politics, for a profound social change!**

The refusal of the constitutional counter-reform have triumphed with 59,1% of the votes. This despite the shameless lies and the false promises of Renzi, the poisonous propaganda of the main media and the foreign interferences, the method of the fear and the terrorism of the “spread”. And also despite the worn attitude of the reformists and the collaborationists chief of the trade unions that tried everything to immobilize the masses.

The proletariat, the youth and popular masses are not deceived or intimidated. Wide sectors have engaged in a multiform campaign of counter-information and denounce that got million of votes to the camp of the NO.

The high popular turnout (68,4%) demonstrated a clear and homogeneous political rejection of the constitutional law that was aimed to strengthen the power of the government and to limit the popular sovereignty, leading to the crushing defeat of Renzi, forced to resign.

Voting NO the exploited and oppressed masses have shown that do not want to be subjugated by financial oligarchy, by the bosses and the parasites that have been the principal promoters and supporters of the constitutional revision, along with their national and supranational institutions.

The avalanche that has buried Renzi and its government has a clear class and popular character. It is the expression of the resistance of millions of workers and unemployed young to the reactionary plans, to the deletion of the “article 18” of the Labour Code, to the destruction of the public school, to the missions of war, to the growing poverty. It is the demonstration of the mass protest against the neoliberal and austerity politics wanted by the UE and applied by the Renzi’s government, of the as well as the discontent toward the capitalistic system that is in a deep crisis. No bourgeois and small bourgeois party can appropriate it.

The triumph of the NO encourages the recovery of the worker and popular mobilization, strengthens the struggle against the UE of the monopolies that will develop, while the conflicts between the bourgeois groups will be sharper, both in the parties and in the institutions. The neoliberal Democratic Party will suffer deep divisions.

However, let us not fool ourselves. The reactionary offensive of the bourgeoisie won't stop. With the worsening of the economic and political situation the most reactionary and imperialist sectors of the financial capital will return to the attack and they will cling to fascism as their life preserver.

Therefore is necessary to realise the unity of action of the working class for the intransigent defence of its own interest; to build a broad popular coalition against the capitalistic offensive, the authoritarian involution and the menace of war; to bar the road to the right populists and xenophobes forces, with the construction and multiplication of the mass organisms (Committees, Councils, Coordinations, etc.) in the factories, in the territory, everywhere.

The result of the referendum, the million of votes collected by the NO, show that exist wide spaces and possibilities of struggle in order to affirm the needs of the exploited and oppressed majority. For this we say:

Out of the power Renzi and all those politicians that tried to twist the 1948 Constitution to support the interest of the financial capital!

Let's prevent with the strikes and the mass demonstrations the neo-center political plan and the insistency on the same line of policy!

Let's say stop to the reactionary, austerity and war politics, to the racism and the xenophobia, to the interferences, the diktats and the blackmails!

We demand the abolition of the "Jobs Act" and of the "Good school", the removal of the other anti-workers and anti-popular laws. No to the fraud national collective agreement, let's fight for true national collective agreement and strong increase of wages for every worker!

We demand the abolition of the "Italicum" electoral law and restoration of the pure proportional with no threshold!

Out of the UE, from the Euro and from the NATO!

We no longer want bourgeois governments, be they reformist, reactionary, populists, "technical" or "wide coalition". In front of the decomposition of the ruling class, that is the responsible of the crisis, the poverty and of the existing chaos, the proletariat has to advance its own government and power alternative, building the necessary power relationships.

With the development of the revolutionary movement of the masses and the political crisis of the bourgeoisie will become possible and necessary the advent of a Government that put the load of the crisis, of the enormous debt, of the taxes, on the shoulders of the ruling class, of the riches and the corrupts, adopting revolutionary measures to go out of the crisis in the interest of the proletariat, assuring job, peace and the vital demands of the workers and popular masses.

To advance on this road is necessary the unity and the struggle of the proletariat, directed by its independent and revolutionary Party.

It is important that all the sincere communists, all the advanced workers, all the young antagonists feel the positive value of these affirmations, to break without hesitations with all the opportunists and wavering forces, to unite themselves to the Marxist-Leninists in order to conquer with the revolution the new society.
