GENERAL STRIKE TO DEFEAT IN THE STREETS AND FACTORIES THE RENZI-BERLUSCONI GOVERNMENT! THE WORKING CLASS TO THE PRIME MINISTER'S OFFICE!

Comrades! Workers! Unemployed! Students and Women of the people!

The struggle against the consequences of the capitalistic crisis and the infamous policy of austerity, imposed by the governments checked by the troika UE-BCE-IMF, has had in the last months meaningful developments.

The demonstration of October 25, the revolt of the workers of Terni, the strikes of the engineering workers, of the grassroots trade unions, the great participation in the mobilizations of the temporary employees, of the students, of the migrants, show as the people of the "1000 Euros a month" is opposing with more and more anger and determination to the gentlemen "of the dinners of 1000 Euros" represented by the anti-working and repressive government of Renzi and Berlusconi.

It is evident that the policy of this government is reactionary, of frontal attack to the interests and the organization of the workers, to exclusive benefit of the capitalistic monopolies.

It is a policy not amendable, that cannot be fought with the hypocrite parliamentary abstention of the reformists.

In this scenery, while the bourgeois Parliament has approved the Jobs Act with the cancellation of the art.18, the leaders of CGIL and UIL have announced for December 12 the general strike.

The guilty delay in its proclamation, that has stopped the continuity and the process of unification of the struggles, is a 'shot in the arm' for the government and the Democratic Party. The syndical bonzes talk of "wrong and ineffective policies of the government", without establishing the objective of its fall but worrying only to brake the working struggle and to recover a negotiating role.

We don't need ritual strikes, so much to make to see that we do something. It is the capitalistic attack that force to look for a different address from that one till now followed by the reformist and opportunist leaders. It take the hard and coherent mobilization up to the withdrawal of the anti-working measures! The rise of the mass struggle leads toward the general and continued political strike, to inflict serious hits to the projects of the financial oligarchy. We must therefore to strike and to go to the street on December 12 with clear passwords and aims, strengthening the working organization worker and preparing to drive away the Renzi government with the struggle!

NO DIKTAT OF THE GOVERNMENT AND UE! NO JOBS ACT! NO MORE PRECARIOUSNESS! NO YIELDING OR EXCHANGE ON THE ARTICLE 18, BUT ITS EXTENSION TO ALL THE WORKERS! STOP TO THE DISMISSALS FOR THE PROFITS! JOB FOR ALL THE UNEMPLOYED! GET YOUR HANDS OFF THE CONTRACTS! ABOLITION OF THE FORNERO LAW! LET'S DEFEAT IN THE FACTORIES AND IN THE STREETS THE ANTI-WORKING, REACTIONARY AND WARMONGERING POLICY OF THE RENZI-BERLUSCONI GOVERNMENT AND LET'S DRIVE AWAY IT!

The sole front of struggle of the working class is able to reject the offensive of the capital and to accelerate the inevitable end of the system of capitalistic exploitation. We will win with the struggle, the unity and the class organization, with the direction of the struggles in the hands of the avant-garde of the working class!

To go out from the crisis and the decline and to give a dignified job is necessary to strike the properties, the profits, the incomes, the revenues, the evasion of masters, banks, rich and corrupt persons. In short we must get it over with the capitalism, to make to become factories and enterprises of social ownership, to repudiate the debt in the hands of the usurers of the big business, to cancel the Fiscal compact, to go out of UE, EURO and NATO.

The unique government that can adopt these measures is a working Government and of the other exploited workers, that must be definite to rout the financial oligarchy, the internal and external reactionary forces, to abolish the exploitation, to build the socialism the society of the workers.

This Government can and must arise from the revolutionary movement of the exploited and oppressed masses, being based on their organisms (Councils and working, popular Committees, class unions, etc.).

The time of the illusions is over. We witness the bankruptcy of the imperialist system gripped by a deep crisis, that tries to save itself intensifying the exploitation of the proletariat and the oppression of the people, preparing new wars of robbery.

The current situation calls the working class and its allies to the preparation of the proletarian revolution, that is the true alternative to free us from the slavery and the master exploitation, from the poverty and the environmental devastation, from the ignorance, from the wars of robbery.

Fighting against the bourgeois governments, for the revolution and the socialism means to make use of essential tool to direct the process of emancipation of the exploited: a strong and combative communist Party of the proletariat.

It is time that the most conscious and combative workers break clearly and definitely with the reformism and the political and union opportunism, for joining the Marxist-Leninists to have this victorious communist Party.
